PG&E STREETLIGHT USE AGREEMENTS

Mr. Berlant:

The City has been approached by PG&E to install and maintain an additional Data Collector Unit (DCU) associated with the Smart Meter Network on an existing streetlight within the City limits.

As was described in my December 2010 letter, the City believes that it is in our best interest to request that the MGSA enter into an agreement with PG&E to allow on additional DCU to be located on streetlights within neighborhoods where the utilities have already been placed underground.

- SL #2558J (DCU# 13418) – 418 Woodhollow Drive

The City will be amending the July 2009 agreement with PG&E to reflect the various changes, including these two streetlight locations.

Please feel free to contact me if you have any questions regarding this evaluation, the conclusions and/or recommended alternative locations.

Sincerely,

Michael Frank
City Manager
